

BZS labeling system - label rail

Product information

The BZS system was developed as a simple means of accommodating a great deal of labeling information in or on the control cabinet.

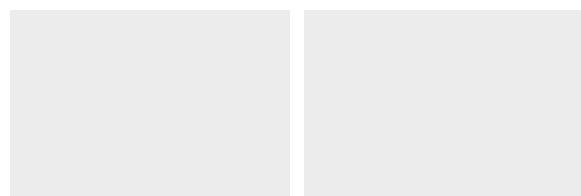

The label holder with the snap-in labels provides vertical and horizontal designations on terminal blocks and other components. It may be fitted on the top-hat rail, C-rail or the cable duct with a high degree of flexibility.

The label holders can be trimmed to any length and they are available in 9 mm and 15 mm widths.

Different mounting modules are available for fixing (see "BZS labeling system - Mounting").

The label plates in the label holders can be protected with covers (see "BZS and BZS/F label holder - cover").
