

FHS-UHE support bracket

Product information

The FHS-UHE makes fixing the cable protection conduit quick and possible without tools. The conduit is fixed with especially low cable wear for light, dynamic applications and without axial movement of the attachment.

The specially coated hook-and-loop tape and the unique shape of the base element gives the system a tight fit on almost any contour. This makes the FHS-UHE suitable for nearly all small robot cable routings.

Advantages:

- no additional components required
- especially gentle on cables
- secure hold, even on conical surfaces
- quick fit, without pre-drilling
- quick routing adjustment is possible during implementation

Information, conformities and approvals

Article	Order No.	Color	Length of hook-and-loop tape mm	Clamping range C mm	Suitable for EW-PAE	Suitable for EWX-PAE	PU pcs.
Suitable for Murrflex EW and EWX nominal width M25/P21

Material properties

mod. polyamide PA 6
Polypropylene (PP)
Thermoplastic elastomer

Conformity

RoHS (EC Directive 2011/65/EU)

Approvals and operating permits

ROBI approval

Classification

ETIM 9: EC000368
ECLASS 14: 23140107
UNSPSC 26.0801: 31162814
