Cable fixing plate type KAF/DC

Product information

The cable fixing plate KAF/DC is suitable for discharging interferences which may occur on cable sheaths. The ground connection occurs via the fixing screws. The version DC is only suitable for direct installation on a conductive background. Stripping the cable in the area of the cable fixing plate and fastening by means of cable ties ensures contact to the cable fixing plate. A low-resistance ground contact is achieved by mounting the KAF on the mounting plate.
The use of two connecting points ensures a good discharge regardless of the position of the cable on the KAF.
