

Robotics kit UNI

Product information

Sets specially adapted to the cable routing on cobots and small robots. The robot kit UNI offers the possibility of professional cable routing on almost all models. The assembly includes the protective conduit, end sleeves and the appropriate fastening with non-slip hook-and-loop tape. Hook-and-loop tapes in four different lengths are included for each fixing point, from which the appropriate one can be selected. For an easier installation of pre-assembled cables, the protective conduit in slit version is included in the FHS-C set UNI-LS.

Advantages:

- low interference contour
- tool-free installation
- secure hold, even on conical surfaces
- quick routing adjustment is possible during implementation
