

## Strain relief type KDZL

### Product information

The KDZL 24 strain relief modules is manufactured from thermoplastic rubber. When combined with KDP/F, the KDZL 24 is a strain relief for cables and pneumatic hoses such as those used in control cabinets, plant or machine construction. Strain relief is achieved e.g. by installing cable ties. Wherever quick assembly, cable-protection and high packing density are required, including good strain relief, the strain relief module is the solution.

Special benefits of the KDZL are:

- Enormous time savings in assembly
- High packing density
- Standard cut-out dimensions
- Large wire diameter ranges
- Easy assembly
- High degree of strain relief
